STREAMING FROM A DEVICE TO A TV

Your guests arrive at the hotel with their own smart devices and their own catalogue of content. Otrum Enterprise enables the guest to easily view their content on the large in-room screen.

Intuitive onscreen instructions guide the guest from start to finish. For security purposes, Otrum utilises secure authorisation between the smart device and the TV, this ensures that content is only shown on the desired screen.

BLUETOOTH

When the installed screen includes a Bluetooth receiver, Otrum Enterprise guides the guest through the Bluetooth pairing process. Once paired, the guest can then listen to their own music through the TV speakers.
